

Analyst Job Description

SUMMARY

Energy Strategies seeks a full-time Analyst with strong research, data collection, quantitative, and analytical skills. This is an entry-level position, but the ideal candidate will have an interest in the electricity industry and be familiar with energy market dynamics. The position requires an ability to work well independently and to support multiple projects concurrently, while successfully interfacing with small internal teams and with existing and potential clients. The position will primarily support Energy Strategies' Markets and Transmission Analysis practice area.
